NEW!

Fabric	Beaver Nylon outershell, Thermal Pile lining
Weight	240g/m ² outershell and 13mm lining
Fabric Technology	Durable water repellent finish
Seam Construction	Double needle top stitching provides durability and strength to seams

Helly Hansen has set the standard for cold weather thermal workwear in Canada. When workers are going to the Far North, or working in -40 degrees, they rely on Helly Hansen to keep them Warm. The windproof lined garments provide the perfect balance between protecting the wearer from the elements while still transferring excess heat away from the body during high activity. Combine with a base layer and Softpile™ for optimal comfort and warmth in your clothing system.

The garment line now features a more generous fit, windbelt for added protection, longer sleeve length, and reinforced elbow and shoulder areas.

Helly Hansen thermal workwear keeps you Dry. Warm. Safe. At Work.
