

## FREEZER SUIT

The freezer parka and pant is essential to all companies that have refrigerated operations. Working in subzero conditions requires protection that will keep you warm, dry and safe.

This suit has the added value of a high bib, when combined with the parka offers excellent and necessary protection for the kidney area. The inner storm cuffs allow for a tight fitting glove that will keep employees warm and comfortable, therefore productive. The nylon lining keeps the workers warm, while the elastic waist and adjustable suspenders create an easy to use garment package. The addition of a 1.5" yellow silver yellow stripe gives greater visibility for workers. A hood can be attached for fitting over a hard hat for even more warmth if needed. This product can be bought at a very competitive price compared to other products in the industry.

Using the Helly Hansen freezer suit will keep users, Dry Warm. Safe. At work.
