INS309 / INSULATED STRETCH PARKA
INS405 / INSULATED STRETCH BIB PANT

INSULATED STRETCH

Parka and Bib Pant

Fabric	PU coated Nylon knit outershell, Thermal Pile lining
Weight	170g/m ² outershell, 13 mm lining
Fabric Technology	Waterproof
Seam Construction	Microweld seams on outershell, rivet reinforced stress points

Tough and durable, waterproof and warm, the INS parka and bib pant are a welcome addition for employees in bad weather. The product is made with PU coated Nylon knit over a thermal pile lining and a vented back. This means it can be effective in extreme cold or wet. The seams are microwelded and the product is reinforced at all the key stress points. It has rust resistant snap closures and a 3 panel stow away hood.

The front of the bib pants has double layer of outershell fabric to keep employees dry and comfortable. The snap adjustments on the lower leg come up to the knee, allowing wearers to put their boots on directly into the garment without removal. The INS line is exceedingly warm and reliable. The garment works in the coldest climates in Canada and is proven to protect.

The INS line has been used extensively in forestry and construction and will keep wearers Dry. Warm. Safe. At Work.
