

# Tuque

⇒ Helly Hansen Bodywear is made from polypropylene and absorbs no moisture, provides excellent ventilation and pushes perspiration away from the body. As a result you avoid cooling down during breaks or periods of lower work intensity and you stay dry, warm and comfortable. The new antimicrobial feature reduces odor and is resistant to bacteria.

The Q891 Tuque is easily donned, stays on in all conditions and looks great. A Poly-Pro accessory it is manufactured from 100% polypropylene, dries quickly and works continuously to move moisture away from the body. Its double layer construction provides medium insulation and wind protection. Close fitting and secure it is also works well as added insulation during short periods on inactivity, under hoods or as a replacement for helmets or hardhats during breaks.

Ideal as a base layer, the Tuque will ensure that you stay Dry, Warm and Safe, at work.
