U500 / SOFTSHELL

# SOFTSHELL

<b>Fabric</b>	94% Polyester, 6% Spandex with Fleece lamination
<b>Fabric Technology</b>	wind and water resistant, breathable

Helly Hansen Workwear's new Softshell garment is important due to its versatility as an outer layer or insulating layer. The Softshell is windproof and offers a strong outer shell that can be worn both on and off the jobsite. Softshell can be worn underneath a protection layer or as a lighter layer with polypropylene underwear during the Spring or Fall work seasons.

The Softshell proudly features our new branding workwear logos as well as a graphic logo on the arm. The Softshell jacket is able to be embroidered with ease as the placement of Helly logos provide ample room for your company to embroider it's corporate identity.

Light insulation makes this garment ideal for spring and fall. Worn in combination with Helly Hansen's 3 layer system, this water and wind resistant garment will keep you dry, warm and safe at work.
